

ISO CRYOGENIC TANKS

The ISO-PACK 2000 6bar is a vacuum insulated liquid gas transportable / storage tank, designed to transport liquid Nitrogen by road, rail and sea. The tank dimensions meet the requirements of DNV, IMO and CSC.

The ISO-PACK is used primarily for offshore operations and OHS customers include all major well service companies. In addition to European and International approvals, the ISO-PACK 2000 (6bar) also has US DOT approval which permits the use of the tank in North America.
